Bilateral Meetings

- Wednesday (10:00 - 12:30)
- Wednesday (14:00 - 16:30)

Description

Founded in 2000, CAVEDIGITAL is a software house headquartered in Lisbon, Portugal and that has been helping Leadership Teams digitally transform their organizations with SMART GOVERNANCE for more than a decade. From the get-go, on a XXI century culture, CAVEDIGITAL has been repeatedly awarded as a good practice for Public Administration Modernization and featured in several international events and conferences.

Debt-free and founder led, CAVEDIGITAL operates under high confidential and security standards, while keeping a very low employee turnover, ensuring maximum stability and long-term positioning for customers and business partners. CAVEDIGITAL, being a product company, has registered for the last 3 years an average annual business growth of +30% and its customers collectively employ well over 250,000 people.

Product

Smart Governance by CAVEDIGITAL

SMART GOVERNANCE is a software product, developed by CAVEDIGITAL, which renders entire decision-making ecosystems paperless and agile, modernizing work practices and corporate governance.

Out-of-box, this includes all hierarchical decision-making processes and the corporate governance processes (committee meetings, leadership team meetings, board of directors meetings, and other corporate governance meetings) - all in one streamlined process, and on a single platform. When proposals achieve a decision, these can then be forwarded for execution to the relevant stakeholders in the organization. Multi-organizational decision-making ecosystems are also supported (e.g.: parent company and subsidiaries, city council and city agencies, ministry and government agencies, etc.).

SMART GOVERNANCE helps organizations implement lead practices on their decision-making processes, while empowering with collaboration and still being able to handle a high volume of complex hierarchical and corporate governance structures.

Achieving transparency, compliance, auditability and accountability is key so these organizations are not opaque to their Leadership Teams, who gain access to real time information and agile cross-organization processes.
