Bilateral Meetings

- Wednesday (10:00 - 12:30)
- Wednesday (14:00 - 16:30)

Description

We are a startup that develops medical devices for different purposes. The company emerged after the reunion of the founders on a product idea - the Otitest (see more here please: www.otitest.com), while at a master formation at University of Porto. With their tenacity and the ambition to bring this product to market, Metablue was created and invested by BA in over 500 000 €. Right now, the company is presenting to the world its first product - the Lipowise (see more here please: www.lipowise.com). We are a Spin-off of University of Porto, and each one of our products has IP protection granted in the US and Portugal, and pending in EU. Our ambition is to create useful medical gadgets, that aim to simplify the life of our clients, and we are looking for new investors or commercial partners.

Offer

Lipowise - the revolutionary lipotool

We have created a great Fitness Tool (please see: <https://www.youtube.com/watch?v=RPoPm7WqJ90> and www.lipowise.com) - the IoT device - Lipowise. We want to find a partner for the implementation of measurement as a service business model.
