IS4Health

Bilateral Meetings

- Wednesday (10:00 - 12:30)
- Wednesday (14:00 - 16:30)

Description

IS4Health is a spin-off company of the University of Porto, founded in December 2013, which develops and sells interactive systems for healthcare. Its main product, IS4Learning, is a virtual patient medical simulation technology for the mass teaching and certification of auscultation skills, resulting from 10 years of research on digital auscultation in the areas of education, telemedicine and computer-assisted decision.
