Bilateral Meetings

- Wednesday (10:00 - 12:30)
- Wednesday (14:00 - 16:30)

Description

Sensing Future Technology designs, develops and implements technological medical devices

Organization Type

Company

Organization Size

1-10

Founding Year

2011

Offer

Pressure Sensors to Healthcare applications

Pressure Sensors with several applications:

- pressure platforms
- insoles
- mattress
- chairs

Cooperation Offered

1. Outsourcing co-operation
2. Technical co-operation
3. License agreement
4. Manufacturing agreement
5. Sales / Distribution

Offer

Medical device to rehabilitation based in VisualFeedback

PhysioSensing consists of a pressure platform, which sends real-time data to a software and displays to users and health professionals. It allows balance and posture assessment in various anatomical planes. Also it makes load transfers possible in various plans and performs and analyses dynamic movements. It provides real-time visual biofeedback through very intuitive interfaces, provides valuable objective data to health professionals and even an extra motivation for users in rehabilitation.

Features: Visual Biofeedback; Balance and Stability; Load Transfers; Plantar Pressure Map.

Cooperation Offered

1. Sales / Distribution

Offer & Request

Expertise in Hardware and Software development to H2020 Health Projects

Medical Devices - Electronic Health Record- Telemedicine- Medical Robotics- Instrumentation- Active Ageing- Diagnostic- Patient Monitoring - Sensors Pressure

Know-how:

ROSE
