Bilateral Meetings

- Wednesday (14:00 - 16:30)

Description

Seamlink delivers a mobile service that brings patients closer to their healthcare provider through customized apps and smart system integrations.

Organization Type

Company

Organization Size

1-10

Offer

Patient communication solution

GatewayBox is a service focused on delivering a modern and easy to use patient communication system through a customized Mobile App.

Patients are able to receive notifications about future appointments, book new appointments, answer to satisfaction surveys or check their personal history, just to identify some features.

Please feel free to get in touch with us if you're a healthcare representative or work for healthcare related ITC company and would like to know more about us.
